RLI TRANSPORTATION

PARTNERING FOR SAFETY

RLI Transportation has partnered with **Professional Safety Consulting (PSC)** to provide your clients and prospects access to the industry's finest safety and driver education resources.

This unique partnership with PSC, the nation's leading provider of risk management resources to transportation companies, allows RLI Transportation to provide access to the PSC Platinum Membership as well as a wealth of free, exclusive services to your insureds, including:

- Web resources and training:
  - Downloadable forms (exclusive access to templates)
  - Safety Manual (online transportation safety and compliance manuals)
  - Friday Safety Brief (weekly access for safety managers and directors)
  - Industry specific podcast gallery
  - Coaching modules
  - DOT required forms (all required and up to date forms)
  - Newsletter templates (The Driver Communique)
- Most customers will receive on-site or phone evaluations and a follow-up report.
- Recommendations tailored to customer directing them to specific training in the PSC web portal.
- Special member call-in consultation. Provides a company overview, statistics, goal setting guide and timeline.
- Customers will receive "What to Do When an Accident Happens" and easy to understand forms to complete in case of an accident.
- Access to quarterly agent and customer safety webinars.

In addition, customers may request additional benefits and resources at their own expense.

If your agency is looking for options to offer safety support and guidance to your insureds and prospects, look no further than the partnership between RLI Transportation and PSC.

The Loss Control savings and benefits are substantial. One of PSC's long term customers completed an independent actuarial analysis and it was determined that overall risk evaluation ratios were effective in yielding accurate predictions regarding loss ratios. An above average risk initially had a loss ratio of 34.3% and, three years later with continuous loss control, the loss ratio was reduced to 14.7%.
